Join a Working Group

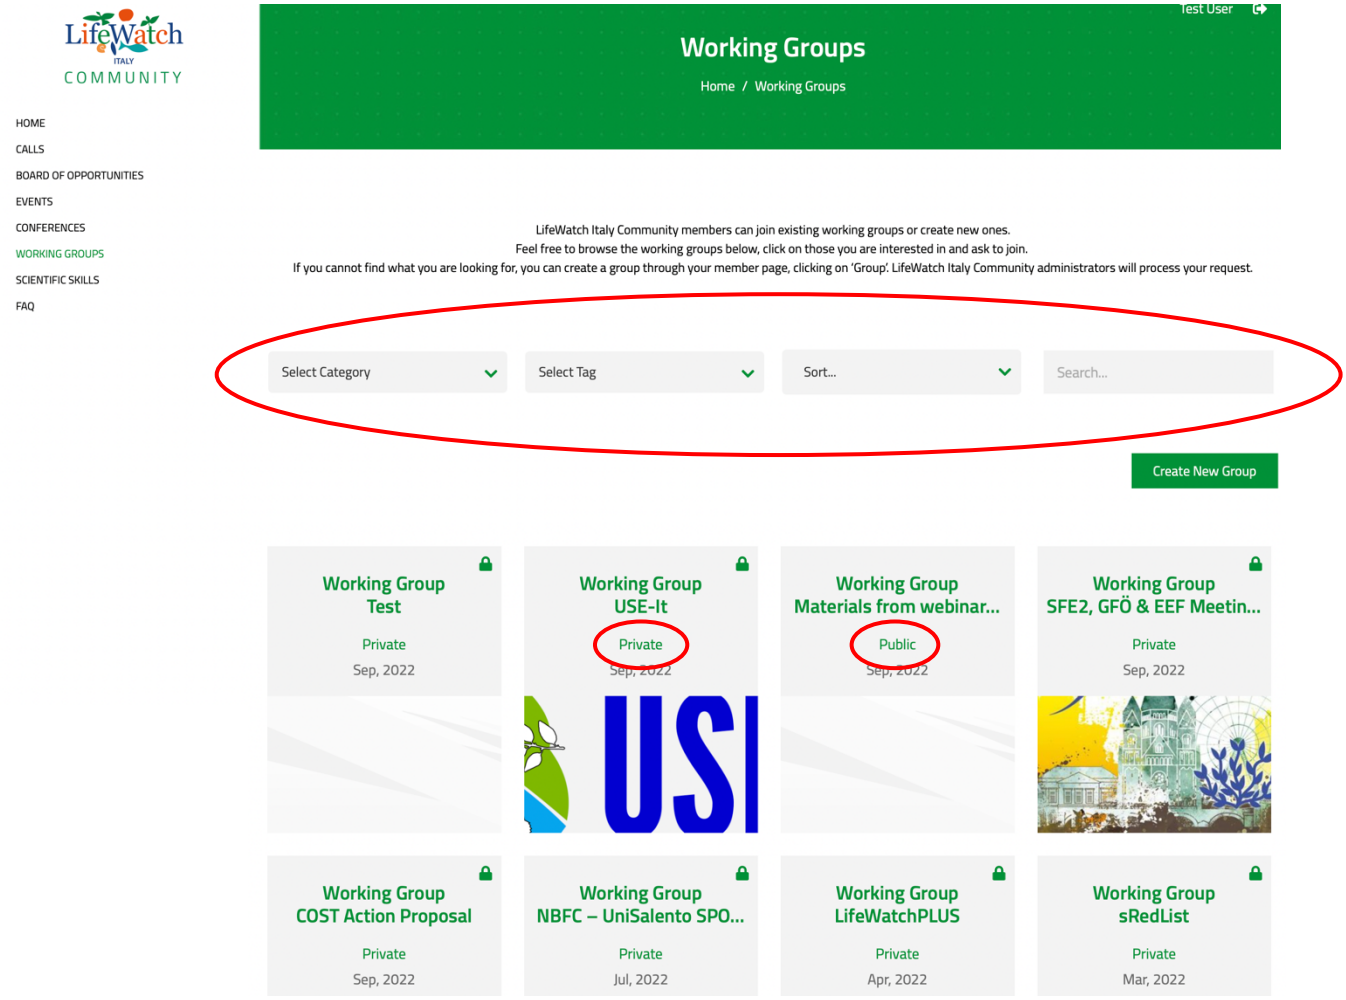

Once your LifeWatch Italy Community account is approved by an administrator, you will be able to create your own working group and/or **join a working group created by another user**.

To do so, you first need to access your Community profile using the Log in button located at the top right-hand corner of the screen.

1. Once logged in, select the Working Groups page in the left-hand side menu. In this page you will see all the groups that have been created by users and set as public or private.
N.B. You will not be able to see secret groups. To access a secret group you need to be invited by the working group administrator.

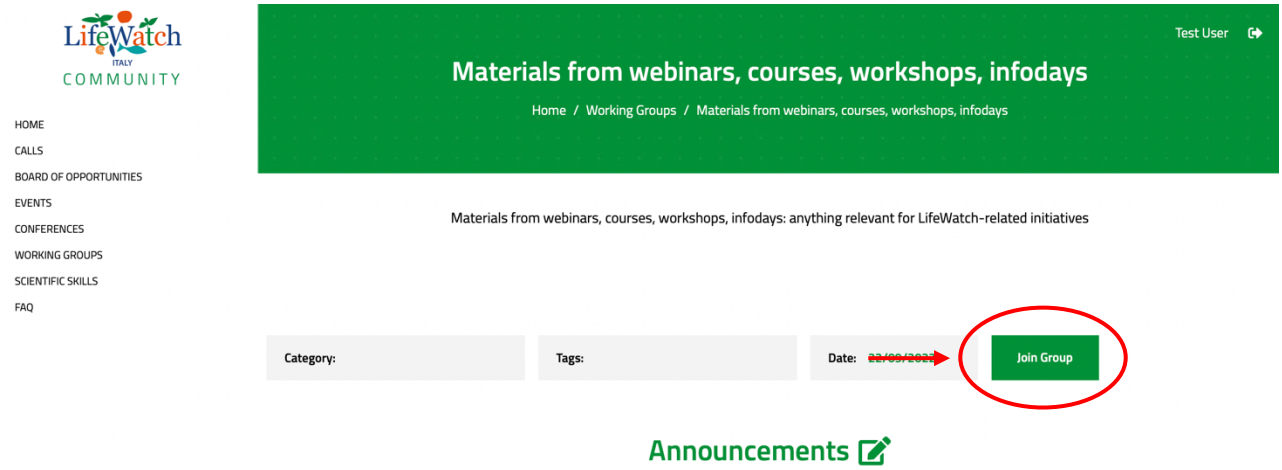

2. Browse through all the available groups. You can use the category and the tag search, you can sort groups by title and date, and/or type a keyword and conduct a search.

3. When you find a group that interests you, **the way you join depends on the privacy settings of the group**.

If it is a **public group**, you can have **immediate access by selecting the group and then clicking on the Join Group button**.

If it is a **private group**, you select the group and the Access Denied message will show. In this case, you must **click on the Join Group button and** then will have to **wait for the group administrator to approve your request**.
